ASSOCIATIONS BY SECTOR

This booklet lists the Sectors grouped under Metric Commission Canada's Steering Committees, the Standard Industry Classification Number* and typical industries covered by the respective Sectors and also the Associations represented on the Sector Committees. It is intended as a guide and reference document for individual organizations to determine which Sector Committees cover their area of interest in the context of metric conversion.

Since metric conversion is a dynamic program, the composition of Sector Committees has changed from time to time and may still change.

For further information on a particular Sector and its metric conversion plan, your best source of up-to-date information is your national association. Organizations which are not members of any association may still make enquiries of the appropriate national association. If additional information is required, please write on your organization letterhead to:
